Introduction

The Group interim financial report of MAN Aktiengesellschaft meets the requirements for a half-yearly financial report in accordance with the applicable provisions of the *Wertpapierhandelsgesetz* (WpHG – German Securities Trading Act) and, in accordance with section 37w(2) of the WpHG, comprises the interim consolidated financial statements, the interim management report of the Group, and a responsibility statement. The interim consolidated financial statements have been prepared in accordance with the International Financial Reporting Standards (IFRS) and the related Interpretations issued by the International Accounting Standards Board (IASB), as adopted by the European Union (EU). The Group interim financial report should be read in conjunction with our annual report and the additional information on the Company contained in it.

MAN Group in Q2 2008:

Strong net sales and earnings growth

- Order intake up 8% to €10.3 billion in the first half of 2008, and up 8% to €5.1 billion in Q2 – decline in Commercial Vehicles order intake
- Strong net sales growth: up 20% to €8.1 billion after six months (€6.8 billion), and up 23% to €4.3 billion in Q2 (€3.5 billion)
- At €1,017 million in H1/2008 (€721 million), operating profit exceeds the one billion mark for the first time; operating profit up 39% to €562 million in Q2 (€403 million)
- Return on sales (ROS) 12.6% in the first six months (10.7%), or 11.9% (10.0%) excluding Scania dividend (€57 million)
- Earnings per share €4.75 compared with €3.55 (including nonrecurring income: €5.18 compared with €4.47)
- Outlook: For 2008, we expect the order intake to normalize, net sales to increase by a good 10% as against 2007 (€15.5 billion), and a return on sales of just under 12%.

Interim Management Report of the Group as of June 30, 2008

Economic environment

Global economic development remained mixed in the second quarter. The financial market crisis has not yet been overcome, and the extent to which it will curb growth in the real economy is still unclear. Economic growth is being impacted by commodity and energy prices – which have soared in some cases – and the continued strong euro, while inflation has also risen sharply. The U.S. economy is particularly affected by these factors. The momentum in the growth markets of Asia and Central and Eastern Europe has slowed, although economic growth remains dynamic in these markets – especially in China and Russia.

Further increase in order intake, strong net sales growth

As expected, growth in the order intake slowed in the first half of 2008 following the substantial increase last year. We booked orders worth €10.3 billion in the first six months of 2008, up 8% on the prior-year period (€9.6 billion). The order intake in the second quarter amounted to €5.1 billion compared with €4.8 billion (+8%).

Incoming orders are now beginning to normalize after delivery times for commercial vehicles reached an exceptional level due to the large number of orders in recent quarters. The order intake in the Commercial Vehicles business area totaled €6.3 billion in the first half of 2008, down 3% year-on-year (€6.5 billion). Diesel Engines again increased its orders in the first six months compared with the extremely high prior-year level; the order intake rose by 17% to €1.8 billion (€1.5 billion). At €0.7 billion, Turbo Machinery's order intake in the first half of 2008 was up slightly on the previous year (+2%). The Industrial Services business area doubled its order intake year-on-year to €1.3 billion in the first half of 2008 (€0.6 billion); this was due in particular to the contract for a major project being signed.

Orders from abroad increased by 15% to €8.2 billion in the first six months of 2008. Most of this growth is attributable to the Project business within Industrial Services, as well as to orders for Diesel Engines. By contrast, the order intake in Germany fell by 13% to €2.1 billion (€2.5 billion) in the first half of the year, primarily due to lower truck orders. The order backlog reached a new record of €16.5 billion, climbing by 12% since the beginning of the year (€14.8 billion).

In the first half of 2008, we significantly increased net sales by 20% to €8.1 billion (€6.8 billion), with all business areas recording double-digit growth. The strongest growth was generated by Commercial Vehicles, which lifted its net sales by €0.8 billion to €5.4 billion (€4.6 billion) (+17%). Net sales at Diesel Engines were up by 27% to €1.2 billion (€0.9 billion), at Turbo Machinery by 18% to €0.6 billion, and at Industrial Services by 24% to €0.7 billion. Net sales from abroad rose to €6.1 billion (+19%), while net sales in Germany reached €2.0 billion (+21%).

Further increase in profitability

In the second quarter, we continued the substantial improvement in earnings that we achieved in the first quarter. The MAN Group's operating profit rose by 39% to €562 million (€403 million); the dividend payment from Scania accounted for €57 million of this (€43 million). At €1,017 million (€721 million), the MAN Group's operating profit exceeded the one billion mark for the first time on a cumulative basis over the first six months (+41%). We therefore increased our return on sales, excluding the Scania dividend, by just under two percentage points from 10.0% in the previous year to 11.9% in the first half of 2008. Including the Scania dividend, the return on sales reached 12.6% (10.7%).

All business areas contributed to the further increase in the MAN Group's profitability and lifted their return on sales and operating profit year-on-year in both the second quarter and the first six months. Commercial Vehicles increased its operating profit by €169 million from €434 million in the previous year to €603 million (+39%), primarily due to higher volumes. As a result, the return on sales after the first six months amounted to 11.2% (9.4%). Diesel Engines also significantly improved its operating profit in the first half of the year from €123 million to €179 million (+46%) together with an increase in the return on sales, which climbed to 14.9% (13.1%). Turbo Machinery lifted its prior-year operating profit of €41 million by more than half to €63 million, generating a return on sales of 11.0% (8.5%). Industrial Services improved its operating profit to €68 million (€53 million) in the first six months; this corresponds to a return on sales of 9.5% (9.2%).

As in the previous year, we reported the stock split and subsequent stock repurchase by Scania as a nonrecurring item within income from financial investments. This nonrecurring income amounts to €65 million in the half-yearly financial statements. In the prior-year period, nonrecurring income totaled €241 million, of which €33 million related to the stock split and subsequent stock repurchase by Scania.

The MAN Group's earnings before taxes including nonrecurring income improved to €1,080 million in the first half of the year (€935 million). Net income rose to €768 million (€668 million). Excluding nonrecurring income, earnings per share from continuing operations reached €4.75 compared with €3.55 in the prior-year period. Including nonrecurring income, it amounts to €5.18 (€4.47).

Outlook for the MAN Group

The economic outlook is largely dependent on overcoming the financial market crisis, the stabilization of energy and commodity prices, inflation trends, and the euro/dollar exchange rate. No significant improvement in these factors is currently apparent. Despite these risks, fundamental long-term growth forecasts appear to be intact. We therefore continue to regard the economic outlook for the markets relevant to our products as generally positive, although we expect a slowdown in demand for commercial vehicles.

We continue to forecast positive development for full-year 2008: While we expect the MAN Group's order intake to normalize, we will increase net sales by a good 10% in 2008 compared with the prior-year figure (€15.5 billion). We are predicting our full-year return on sales (ROS) to be just under 12% (previous year: 11.2%).

High cash earnings in the Industrial Business

In the first six months, cash earnings improved from €776 million in the previous year to €879 million. Cash earnings in the prior year included €236 million from the ERF settlement. Cash flow from operating activities generated by the Industrial Business reached €807 million, while Financial Services recorded cash flow from operating activities of €-294 million due to the planned expansion of the financing business with commercial vehicle customers. The MAN Group's cash flow from operating activities therefore totaled €513 million in the first half of the year.

In addition to the investments in tangible assets, the net cash used in investing activities of €284 million mainly reflects the sale of Scania B shares and in return the purchase of Scania A shares, and the acquisition of 25.13% in EURO-Leasing GmbH in the first quarter. The MAN Group's free cash flow thus reached €229 million in the second quarter of 2008, while the figure for the Industrial Business is €554 million.

The MAN Group's net financial debt amounted to €672 million on June 30, 2008, compared with €447 million at the end of 2007; the Industrial Business had net liquid assets of €1,224 million (€1,148 million). The rising business volume at Financial Services is increasingly being financed externally; net financial debt recorded by Financial Services therefore rose to €1,896 million in the first half of the year (€1,595 million).

Headcount continues to grow

As of June 30, 2008, the MAN Group employed 57,179 people, an increase of 2,093 compared with December 31, 2007 (55,086). At the end of the second quarter, the workforce totaled 32,383 people in Germany, and 24,796 abroad; the proportion of employees abroad was therefore unchanged at 43%.

The growth in the headcount is attributable to the continued volume increase in the manufacturing areas. The number of employees at Commercial Vehicles rose by 1,311 to 37,902. There were also increases at Diesel Engines (+322 to 7,705), Turbo Machinery (+195 to 4,206), and Industrial Services (+95 to 4,782). The MAN Group had 4,051 temporary employees as of June 30, 2008 (December 31, 2007: 4,031).

Risk report

The MAN Group's risk situation has not changed significantly as against our assessment in the financial statements for 2007.

MAN stock

The first half of 2008 on the global stock markets was dominated by the poor economic outlook in the United States and the related fears of recession. In addition, rising crude oil and commodity prices led to inflation in the euro zone which, coupled with expectations of increasing interest rates, additionally impacted Germany's leading index, the DAX. On July 3, 2008, the European Central Bank raised its key interest rate for the first time since the outbreak of the credit crisis by 25 basis points to 4.25%. All in all, the DAX's 20th anniversary year began with the worst first six months in its history. MAN stock was also unable to escape this trend and lost more than a third of its value.

In the period from January 1, 2008 to June 30, 2008, the MAN share of common stock fell by €43.29 or 38% from a closing price of €113.80 on December 28, 2007 to €70.51 on June 30, 2008. The DAX lost 20% of its value in the same period.

On June 30, 2008, MAN AG's index-related market capitalization amounted to €8,354 million, based on a 70.1% free float. MAN was therefore 22nd in the DAX ranking at the end of the quarter, compared with 20th in the previous quarter. In terms of trading volume, MAN remained in 19th position in the first half of 2008.

1) Headcount as of June 30, 2008 vs. December 31, 2007

2) Including temporary employees

Incoming orders at Commercial Vehicles are now beginning to normalize after delivery times reached an exceptional level due to the large number of orders in recent quarters. At €5,554 million, the order intake for Trucks was 2% below the prior-year level (€5,688 million). The order intake in terms of truck units fell by 15% in the first half of the year. The much lower 2% decline in the order intake figure is mainly due to an improved model mix and higher-margin features in the vehicles sold. The order intake in the Buses division declined, in particular due to the drop in the number of coaches and cross-country buses sold. This was partially offset by the major order placed by the city of Ankara for 552 city buses (€83 million) in June, which meant that the overall order intake for buses was 10% below the previous year at €731 million. The order intake in terms of bus units fell even more by 19% because fewer chassis were ordered.

Net sales at Commercial Vehicles rose by 17% to €5,380 million. The Trucks division primarily recorded an increase in net sales of heavy vehicles by €4,681 million (+20%). Net sales of buses fell by 2% to €699 million. The drop in bus unit sales relates exclusively to chassis, which generated significantly lower revenue per vehicle. Deliveries of complete buses were 8% higher than in the first half of the previous year.

The earnings situation at Commercial Vehicles continued to improve in the first half of 2008. Operating profit increased by €169 million to €603 million (€434 million), primarily due to higher volumes, and the return on sales thus rose to 11.2% (9.4%). The Trucks division generated a return on sales of 12.7% in the first six months (11.1%), to which the heavy trucks contributed a return on sales of 13.9% (12.8%).

Following the losses in the past fiscal year, the Buses division generated an operating profit of €3 million in the first six months (operating loss of €13 million). The steps taken to restructure the division included the complete integration of the bus operations into the Commercial Vehicles organization and the restructuring of Neoplan's plants in Germany. We expect the implementation of these restructuring measures to lead to a substantial year-on-year improvement in earnings in 2008.

In view of the healthy order backlog at Trucks and the initial progress in restructuring the Buses division, we remain confident about business development for the rest of the year. Overall, in 2008 we expect net sales to increase to around €11 billion (€10.4 billion) and the return on sales to be on a level with the first half of the year.

DIESEL ENGINES

€ million	H1/2008	H1/2007	Change in %	Q2/2008	Q2/2007	Change in %

¹⁾ Headcount as of June 30, 2008 vs. December 31, 2007

²⁾ Including temporary employees

With an order intake of €899 million in the second quarter of 2008, Diesel Engines again matched the volume of the prior-year quarter. In the first half of 2008, the order volume of €1,803 million exceeded the already high prior-year figure of €1,537 million by 17%. In the very profitable Two-Stroke division, orders amounted to €571 million, up 29% on the previous year (€443 million). The orders at Four-Stroke rose by 13% to €1,232 million (€1,094 million). The power plant business in particular recorded an encouragingly high order intake in the reporting period.

Net sales totaled €1,199 million in the first half of 2008, up 27% on the prior-year figure of €941 million. Two-Stroke's net sales increased by 26% year-on-year to €365 million (€290 million), while Four-Stroke's net sales were up by 28% on the previous year to €834 million (€651 million). The extremely tight delivery situation at many suppliers has not fundamentally improved.

Operating profit improved by €56 million compared with the previous year to €179 million (+46%). Two-Stroke's operating profit rose by €23 million to €89 million (€66 million), while Four-Stroke's operating profit climbed to €90 million (€57 million). As a result, the return on sales was 14.9% in the first half of 2008 (13.1%).

For fiscal year 2008, we expect another encouraging order intake that is slightly below the previous year's record level (€3,371 million). We are forecasting 20% year-on-year growth in net sales. Operating profit will also continue to improve significantly compared with 2007 (€313 million).

TURBO MACHINERY

€ million	H1/2008	H1/2007	Change in %	Q2/2008	Q2/2007	Change in %
Order intake	737	723	2	369	370	0

			in € million			in € million
Operating profit	63	41	22	35	23	12
ROS in %	11.0	8.5	–	11.0	8.7	–

¹⁾ Headcount as of June 30, 2008 vs. December 31, 2007

²⁾ Including temporary employees

The strong demand for turbo machinery and drive turbines continued in the second quarter of 2008. With an order intake of €737 million, Turbo Machinery again exceeded the high prior-year figure of €723 million. While the New Plant unit recorded a slight year-on-year decline in orders, demand for services further increased. The Services unit therefore continued its strong performance from the first quarter and substantially increased its order intake as against the previous year. This is also due to sustained efforts to develop the markets, that began in previous quarters.

The continued strong order situation and the further expansion of capacity led to a significant year-on-year increase in net sales, which climbed by 18% to €571 million due to the growth achieved in the New Plant unit and in particular in Services. Higher net sales, improved margins from invoicing, and the continued high capacity utilization lifted the operating profit by €22 million year-on-year to €63 million. As a result, Turbo Machinery generated a double-digit return on sales of 11.0% in the first half of 2008, compared with 8.5% in the prior-year period. This substantial improvement in earnings quality was also driven by the measures implemented in previous years to optimize business processes.

On the basis of the order intake in the middle of the fiscal year, we expect Turbo Machinery's full-year 2008 order volume to remain at the high prior-year level (€1,454 million). In the second half of the year, we aim to continue the growth in net sales and operating profit that we achieved in the first six months, and therefore significantly exceed prior-year net sales (€1,108 million) and operating profit (€104 million). The capacity expansion and purchasing measures that we have initiated to improve subcontractor delivery times will play a key role here.

ROS in %	9.5	9.2	-	9.8	7.6	-

1) Headcount as of June 30, 2008 vs. December 31, 2007

2) Including temporary employees

Industrial Services generated a cumulative order intake of €1,299 million in the first half of 2008 – double the figure for the previous year. This increase is attributable to the Projects division, which recorded an order intake of €737 million in June for a Venezuelan power plant project. The Services division was slightly below the prior-year figure.

Cumulative net sales amounted to €720 million, up 24% year-on-year. The Projects division in particular exceeded the 2007 figure (+63%) because it has recorded significant progress in a major order in Trinidad since the beginning of the year. Net sales generated by Services were down 10% year-on-year as two major orders in the form of a rolling mill line in China and a gas pipeline in Uzbekistan were invoiced in the first half of 2007. At €68 million, operating profit in the Industrial Services business area was up significantly on the previous year (€53 million), taking the return on sales in the first six months to 9.5% (9.2%).

For fiscal year 2008, we expect the operating profit to be on a level with the prior-year figure (€179 million). We are forecasting substantial year-on-year growth in the order intake, although this depends heavily on the award of major projects.

1) Headcount as of June 30, 2008 vs. December 31, 2007

2) Including temporary employees

"Others/Consolidation" comprises the Renk industrial subsidiary, the MAN AG Corporate Center and its shared services companies, as well as the consolidation items between the MAN Group's business areas.

At €215 million, Renk's order intake in the first six months was on a level with the previous year (€221 million). Sales rose by 26% to €247 million (€196 million). Operating profit climbed to €37 million (€31 million), despite being impacted by increased warranty costs for vehicle gearboxes. As a result, Renk's return on sales fell to 14.9% (15.8%).

In the first six months of 2008, the operating loss in the Corporate Center and its shared services companies amounted to €3 million (€12 million). This improvement is mainly due to the realization of share price gains of €14 million from the exchange of Scania B shares for Scania A shares in the first quarter and the gain of €6 million on the sale of investment properties.

MAN Statement of Changes in Comprehensive Income

reporting period January 1 to June 30

€ million	2008	2007
Currency translation differences	-60	-9
Change in fair values of securities and financial investments	-861	606
Change in fair values of financial derivatives	13	-7
Actuarial gains/losses from pensions	25	165
Elimination of unrealized gains/losses on divestments	0	2
Deferred taxes	-5	-57
Net gains/losses recognized directly in equity	-888	700
Net income	768	668
Total comprehensive income/loss	-120	1,368
thereof minority interests	7	8
thereof MAN stockholders	-127	1,360

The €888 million net loss recognized directly in equity primarily includes the €866 million decrease in the fair value of the Scania AB (Scania) stock held, as well as actuarial gains from pensions, in particular as a result of the increase in the discount rate applied to German pension obligations from 5.25% as of December 31, 2007 to 5.75 % as of June 30, 2008. It also includes the €13 million change in the fair values of financial derivatives and an unrealized loss of €60 million on the translation of the financial statements of consolidated non-German subsidiaries.

Notes to the Interim Consolidated Financial Statements

Basis of presentation

The accompanying interim consolidated financial statements for the period ended June 30, 2008 were prepared in accordance with the International Financial Reporting Standards (IFRS) and the related Interpretations issued by the International Accounting Standards Board (IASB) applicable to interim financial reporting, as adopted by the European Union. Consequently, these interim consolidated financial statements do not contain all the information and disclosures required by IFRSs for full-year consolidated financial statements, and should be read in conjunction with the Company's published IFRS consolidated financial statements for fiscal 2007. Unless expressly indicated otherwise, the accounting policies applied to interim financial reporting in these interim consolidated financial statements are identical to those adopted for the most recent full-year consolidated financial statements; a detailed description of these accounting policies is given in the notes to the consolidated financial statements for the year ended December 31, 2007.

From the Executive Board's perspective, the accompanying unaudited interim financial report reflects all standard intraperiod adjustments required for the presentation of a true and fair view of the Group's net assets, financial position, and results of operations. The results presented for the first six months of fiscal 2008 and the second quarter of fiscal 2008 are not necessarily indicative of future results.

Preparation of the interim consolidated financial statements requires the Executive Board to make certain assumptions and estimates affecting the measurement and presentation of assets and liabilities, and income and expenses, for the period. Actual amounts may differ from these estimates. In addition to the amounts contained in the financial statements, interim financial report contains explanatory notes on selected financial statement line items. Selected segment information is contained on pages 8 to 14 of this Group interim financial report. To enhance comparability, certain prior-year figures have been reclassified to conform to the current-year presentation.

To enable a better insight into the MAN Group's net assets, financial position, and results of operations, the interim consolidated financial statements have been supplemented by a breakdown of figures into the Industrial Business and Financial Services. The Industrial Business comprises all parts of the MAN Group with the exception of MAN Finance. In the MAN Group, MAN Finance primarily operates the sales financing business for the Group's commercial vehicles and is presented under the "Financial Services" heading. To simplify presentation, the elimination of intragroup transactions between the Industrial Business and Financial Services is presented within the Industrial Business.

Basis of consolidation

The interim financial statements as of June 30, 2008 include 167 companies (December 31, 2007: 158), including 62 (63) in Germany and 105 (95) outside Germany. The effects of changes in the basis of consolidation on the interim consolidated financial statements are immaterial.

Income taxes

The current income tax expense presented in the interim financial statements has been determined on the basis of the expected full-year income tax rate.

Income Statement Disclosures

Other operating income

€ million		
reporting period January 1 to June 30	2008	2007
Income from Financial Services	78	85
Gains from financial instruments	45	16
Income from other trade business	20	25
Income from the release of accruals	11	20
Gains from the disposal of tangible/intangible assets	9	12
Nonrecurring income	–	338
Miscellaneous	41	45
	204	541

The gains from financial instruments mainly result from the measurement of foreign currency positions, as well as from hedges of currency and interest rate risks. To enable a better insight into MAN's results of operations, currency translation gains/losses are reported net starting in fiscal 2008. The prior-year figures were adjusted accordingly.

Income from Financial Services represents the income from MAN Finance's business.

Nonrecurring income in fiscal 2007 contains the ERF settlement less derecognized goodwill.

Other operating expenses

€ million		
reporting period January 1 to June 30	2008	2007
Research and development	173	134
Additions to accruals	60	80
Expenses from Financial Services	55	49
Allowances for receivables	40	13
Losses on financial instruments	5	7
Nonrecurring expenses	–	130
Miscellaneous	94	133
	427	546

The losses on financial instruments and expenses from Financial Services match the corresponding items in other operating income.

Nonrecurring expenses in fiscal 2007 relate to the recognition of accruals in connection with the Buses restructuring program and to goodwill impairment.

Income from financial investments

€57 million (€43 million) of the income from financial investments relates to the dividend from the investment in Scania, and €65 million (€33 million) relates to nonrecurring income from the stock split and subsequent stock repurchase by Scania. The stock repurchase reduced cost by €21 million (€65 million).

Net interest expense

€ million		
reporting period January 1 to June 30	2008	2007
Interest and similar income	27	27
less interest reclassified into net sales	-13	-8
Interest and similar expenses	-36	-40
Interest portion of addition to pension obligations	-44	-35
Interest income from CTA plan assets	44	10
less interest reclassified into other operating expenses	20	19
	-2	-27

Earnings per share

€ million (unless otherwise stated)		
reporting period January 1 to June 30	2008	2007
Net income after minority interests	761	662
thereof net result of discontinued operations	-	5
Net income from continuing operations after minority interests	761	657
Number of shares outstanding (million)	147.0	147.0
Earnings per share (in €)	5.18	4.47

The Group's net income from continuing operations after minority interests is divided by the average number of shares outstanding for the year to obtain earnings per share. The number of shares includes both common and preferred stock as both classes share equally in the 2008 earnings, as in the previous year.

There were no dilutive unexercised stock options at either June 30, 2008 or June 30, 2007. Future earnings will be diluted if MAN AG's contingent capital is exercised.

Balance Sheet Disclosures

Intangible assets

€ million	6/30/2008	12/31/2007
Licenses, software, similar rights, as well as customer relations, brand names, and other assets	75	48

Scania stock	972	1,822
Other financial investees	94	90
Shares in investees carried at equity	390	354
	1,456	2,266

The Scania stock held at June 30, 2008 corresponds to 13.32% of the capital stock and 17.17% of the voting rights; this figure is unchanged compared with the end of the first quarter of fiscal 2008.

The Scania stock was measured at fair value on the basis of the quoted market price on June 30, 2008. The €-866 million measurement difference compared with December 31, 2007 was recognized directly in OCI.

The shares in investees carried at equity totaling €390 million (€354 million) are composed of shares in associates amounting to €362 million (€325 million) and shares in joint ventures amounting to €28 million (€29 million).

The shares in associates relate mainly to Roland Holding GmbH, Munich, Germany; CEL Consolidated Energy Ltd., Port of Spain, Trinidad & Tobago; MAN FORCE TRUCKS Private Limited, Akurdi, Pune, India; MAN Region West B.V., Vianen, Netherlands; and EURO-Leasing GmbH, Sittensen, Germany.

The table below presents summarized financial information on associates. The figures relate to 100% of the associates, and not to the MAN Group's share of those associates:
