## Changing Manufacturers to MAN Roland

Australian record sheetfed order

**A leading commercial sheetfed printer in Sydney, Australia, has made the switch to MAN Roland with one of the most significant single orders for new sheetfed presses in the history of the industry.**

The installation at Chippendale Printing in Sydney includes a twelve-colour ROLAND 700 with 6/6 perfecting, the first of its kind in the Asia-Pacific market, as well as a six-colour ROLAND 500 and the option for another ROLAND 700, also possibly six colours, to follow. It is one of the largest single orders for sheetfed units in the region and a notable achievement for local MAN Roland agent, Intergrafica Print & Pack (IPP).

The significance of the order is due not only to its size and specification but also the fact that Chippendale Printing has not previously been a MAN Roland user. Indeed, the new presses will replace the company's existing Heidelberg multi-colour presses.
