

MAN OPTI-CONNECT

A powerful enterprise grade telematics solution

MAN Opti-Connect is a powerful enterprise grade telematics solution, designed to support improved levels of fleet efficiency and safety, and reduce environmental impact.

The solution* has been optimised through millions of hours of customer use, and through combining powerful telematics technology with driver performance tools, to increase fleet utilisation and improve safety outcomes.

* The MAN Opti-Connect telematics solution applies to new MAN vehicles

GET MORE OUT OF YOUR FLEET

Let us help you take control of your fleet with MAN Opti-Connect powered by Microlise:

IMPROVE DRIVING STYLE

Increase fuel economy, reduce costs, and reduce emissions through the identification of improvement opportunities in driving style such as minimising idling, harsh acceleration, and over revving.

MAXIMISE FLEET UTILISATION

Get the most from your assets through real-time visibility and full measurement of usage.

IMPROVE SAFETY

Focus on safe driving measures and reduce speeding, harsh braking, harsh cornering, and acceleration which also improves fuel economy. An optional camera system incorporating a downloadable visual reference to help reduce incidents and insurance costs is also included.

REDUCE ADMINISTRATION

Reduced paperwork, administration time, and effort on the part of drivers and operational staff.

REDUCE EMISSIONS

As well as saving on fuel costs, your fleet being driven more conservatively may lead to fewer emissions, with less impact on air quality and the environment.

TRACK AND MONITOR VEHICLES

Track vehicle movements in real time, improving forward planning, and allowing operators to update customers on timing by analysing historical data.

SECURITY

Get alerts when a vehicle moves outside of working hours and offer your drivers an additional level of security with an optional panic button.

BUSINESS INTELLIGENCE

A powerful management dashboard helps analyse fleet data, and view vehicle and driver performance trends to enable better business planning.

VEHICLE HEALTH & SERVICING

Access to live and historical vehicle data includes key indicators such as engine torque, oil pressure, engine temperatures, brake pressures, battery health, and more. Managing service scheduling keeps vehicles in peak condition and compliant with local rules and regulations.

THE COMPREHENSIVE TELEMATICS SOLUTION

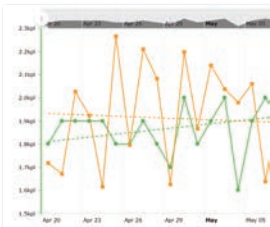

Telematics has become an essential tool in running a transport operation efficiently.

MAN Opti-Connect provides you with key operational information, allowing you to monitor fuel consumption, driver performance, and much more. Dashboards provide full visibility at a glance and fleet managers and owners can delve deep into a rich suite of reports and view options.

Benefits:

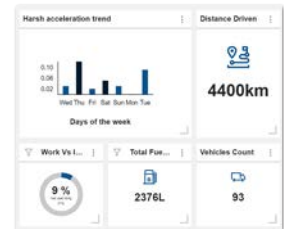

- Reduce planning time with the ability to manually intervene which can accommodate last minute orders and help efficient planning of routes
- Improve fleet efficiency, utilisation, and customer service
- Minimise costs, mileage, empty running, fuel usage, and environmental impact

Fleet Performance

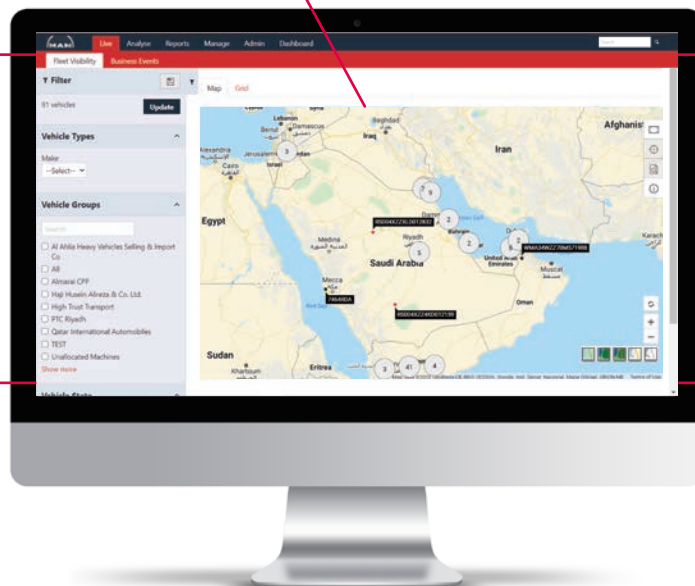

Google Maps to find your assets

Personalised Dashboard

Driving Behaviour

Vehicle Health

REDUCE YOUR OPERATIONAL COSTS

Through monitoring, debrief, and regular coaching in good driving practice, customers have recorded savings of 5-15% in fuel costs resulting in increased profit.

Monitoring of information including harsh braking, speeding, and harsh cornering yields evidence that can be used for coaching drivers in best practice and to support the MAN ProfiDrive solution.

Improved utilisation and fuel efficiency contributes to effective use of vehicles and increased profit.

Benefits:

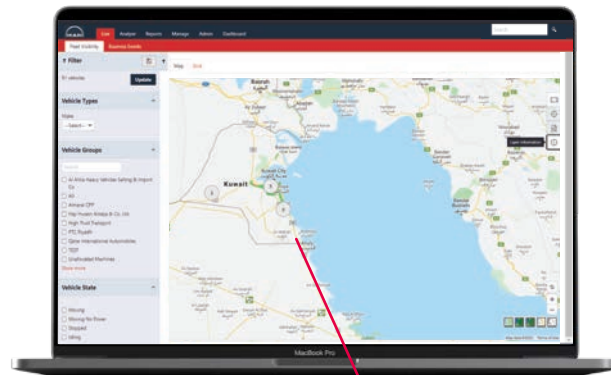

- Make further fuel savings through better utilisation of your fleet
- Better driver performance helps improve safety standards and risk of incidents
- Reduce vehicle wear and tear

GAIN FULL & ACCURATE VISIBILITY

Featuring integration with Google Maps, MAN Opti-Connect lets you locate your vehicles - or groups of vehicles - in real-time, helping to support customer communication.

Receive detailed information about each vehicle at a glance and drill down to a street level view. Playback functionality offers the option to view the historical route taken by a vehicle, allowing you to understand the performance of any given vehicle.

Google Maps integration

Benefits:

- Find nearest vehicle
- Reduce risk of asset loss
- Improve customer service by providing accurate real-time fleet updates

MAXIMISE PRODUCTIVITY

To remain competitive, you need to ensure that you get the most from your assets.

MAN Opti-Connect not only provides real-time visibility, but also highlights turnaround times and when vehicles arrive either late or early. This allows you to make schedule adjustments to ensure everything stays on-track and helps to improve future planning.

Benefits:

- Increase efficiency and remain competitive
- Minimise wasteful empty running
- Track data about delivery-on-time KPIs

Through better understanding of arrival and departure times, improve fleet utilisation by up to

10%

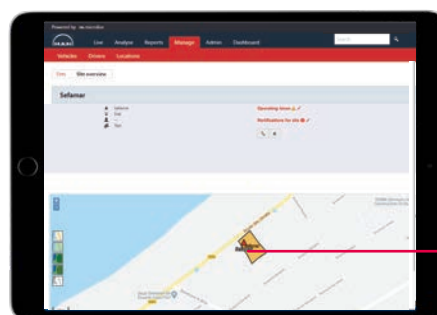

IMPROVE SECURITY & SAFETY

MAN Opti-Connect allows you to effectively 'lockdown' your vehicles using geofences.

If a vehicle breaks the geofence, the system alerts you straight away. In addition, MAN Opti-Connect includes an option to receive alerts, such as when significant changes in fuel levels are detected over a short period of time.

You can also access detailed safety-oriented telematics data, which when combined with optional downloadable camera footage, offers a comprehensive picture of incidents and near-misses.

Geofence functionality

Benefits:

- Lockdown vehicles when not in use
- Be alerted to unauthorised vehicle usage
- Protect vehicles, loads, and drivers

WHY CHOOSE THE MAN OPTI-CONNECT TELEMATICS SOLUTION?

- MAN Opti-Connect is a comprehensive, connected, and easy-to-use program that supports you in running your business more efficiently and profitably.

MAN Opti-Connect delivers:

- Greater control and visibility of your vehicles and drivers
 - Superior planning and routing capability
 - Enhanced customer service
 - Improved vehicle and driver performance and up time
- MAN Opti-Connect comes installed in your new vehicle (subject to order).
 - The solution is supported by MAN expertise to support your operational needs both now and into the future.
 - Seamless installation and support from trained experts and the MAN dealer network providing the ultimate piece of mind.
 - MAN Opti-Connect is supported by ongoing research and development, delivering new features and improvements that increase user value and return on investment.

ABOUT PENSKE

Penske Australia is a leading supplier of the world's finest heavy-duty trucks, diesel and gas engines, and power systems.

Distributing the Western Star Trucks, MAN Truck & Bus, Dennis Eagle, *mtu*, Detroit, and Allison Transmission brands, we operate across the most dynamic markets including on-highway and various off-highway industries such as mining, power generation, construction and industrial, rail, marine, oil and gas, agriculture, and defence.

Penske Australia also represents aftermarket products from leading oil, coolant, and filter brands.

Penske Australia is wholly owned by international transportation services company, Penske Automotive Group, Inc. (NYSE: PAG), and operates independently to service its customer base.

In addition to distributing Western Star Trucks, MAN Truck & Bus, and Dennis Eagle, Penske Australia is also the appointed retail dealer of these brands across select locations, providing full retail sales, service and parts functions.

With over 1,000 employees, we are committed to providing the most comprehensive 24/7 aftersales support through a network of strategically-located branches and field locations, and more than 100 dealers.
