Our minibuses

As diverse as the people you carry.

The MAN TGE minibuses offer the perfect solution for any task and with their highly varied fitting options, they cover the entire range of modern passenger transport requirements.

Thanks to our over 100 years of experience in the utility vehicle segment, we know customers' needs like nobody else. And our expertise speaks for itself: flexible configuration options, innovative assistant systems and a comprehensive service and maintenance offering in trusted MAN quality – round the clock.

Choose MAN when it comes to minibuses.

WHERE EVERY PASSENGER IS A VIP.

The MAN TGE Combi Van offers tailor-made solutions

The MAN TGE Combi Van

Small bus, many possibilities: the MAN TGE Combi Van covers the entire spectrum of passenger transport needs.

To ensure a first-class experience, the MAN TGE Combi Van with the “Shuttle” package is loaded with exclusive and unique fittings. Its numerous highlights like individual passenger climate controls ensure optimal comfort as a high-quality VIP or hotel shuttle. And even factory-direct, the “Basic” package offers as series-standard an emergency braking system and crosswind assistant, which, extraordinary on their own, can be supplemented as needed. With space for up to 2 wheelchairs, the “Mobility” package provides barrier-free and wheelchair-friendly transport for people with limited mobility. The rear ramp, either manually or electrically operated¹, ensures comfortable and secure embarking and disembarking.

¹Special fitting for an additional price.

MAN TGE Combi Van | Flexible special-use vehicle for all requirements.

The MAN TGE Combi: The Allround Minibus for every Purpose.

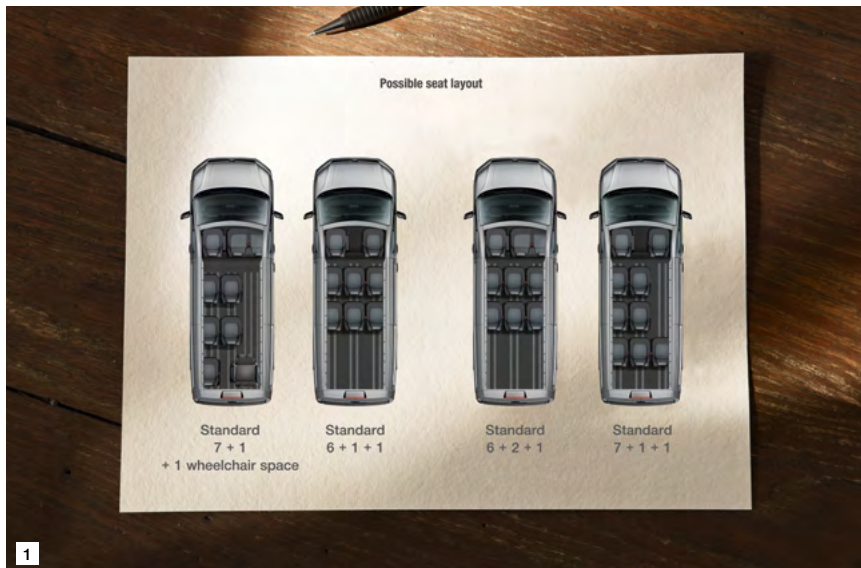

The MAN TGE Combi is the all-rounder among minibuses. Whether used as a VIP shuttle, a small school bus, or for transporting individuals with reduced mobility, the MAN TGE Combi is versatile and flexibly deployable. With its M1 vehicle approval for special purpose, every model comes from the factory with the possibility of wheelchair-accessible transportation. Additionally, the emergency brake assist and side wind assistance are included as standard.

Seat configuration – numerous possibilities

Numerous seating configurations are available for the TGE right from the factory. This allows you to tailor the vehicle precisely to your requirements.

M1 certification factory-direct

Thanks to its certification as an M1 vehicle for special-purpose use, every model of the MAN TGE Combi Van offers factory-direct the possibility for wheelchair transport.

MAN TGE Combi Van | Flexible special-use vehicle for all requirements.

2 – Well-Equipped: The Basic Package

The Basic package covers all the features that are standard for the MAN TGE Combi Van factory-direct. It comprises sturdy side and ceiling paneling in the interior, a spacious luggage compartment, and a maximum of 8 seats (8 passengers, 1 driver).

3 – Travel in Comfort: The Shuttle Package

For a more exclusive driving experience, our „Shuttle Package“ is available, offering a maximum of 8 seats (8 passengers, 1 driver). Equipped with premium side paneling, elegant window trim, and a second climate control system with roof vents, this variant provides maximum comfort. An electric sliding door and a step for easy entry and exit complete the package. The „Shuttle Package“ also offers the option of wheelchair-accessible transportation.

4 – Barrier-Free Transport: The Mobility Package

A barrier-free setup is provided by the „Mobility Package.“ It includes, for instance, 4 seats (3 passengers, 1 driver) and allows for wheelchair-accessible transportation of individuals with reduced mobility, accommodating up to 2 wheelchair spaces. For convenient embarking and disembarking, a manual ramp in the rear area or optionally an electrically operated lift, along with an electric sliding door and a step, are also offered.

2 – Basic Combi

3 – Shuttle Combi

4 – Mobility Combi

5 – Wheelchair Ramp

6 – Wheelchair Shoulder Diagonal Belt

MAN TGE Combi Van | Flexible special-use vehicle for all requirements.

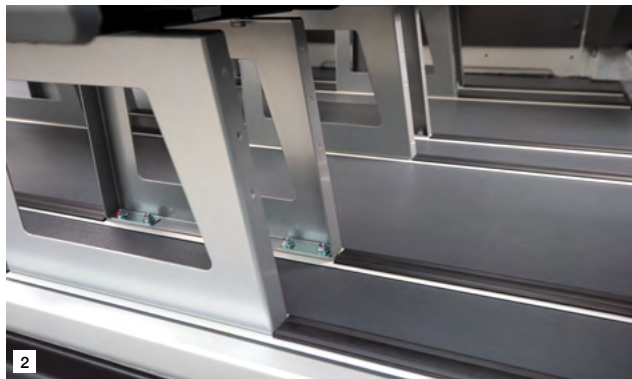

1 – Electric Step

The optionally available electric step on the side sliding door enables ergonomic entry and exit. Equipped with a non-slip stepping surface of 1000 x 290 mm and a maximum load capacity of up to 500 kg, it allows multiple people to use it simultaneously.

2 – Flexible Floor System

An integrated Airline rail system in the floor comes standard on the MAN TGE Combi and provides maximum flexibility. The individual seats with 3-point seat belts can be effortlessly installed and removed, thanks to the practical optional quick-release mechanisms. It is also possible to install the seats facing the opposite direction. The Airline rail system can also be used to secure luggage.

3 – USB Outlets

As additional optional equipment, the MAN TGE Combi can be equipped with 4x USB outlets (Type A + Type C). This provides each passenger with individual options to charge their electronic devices.

THE SPACE POSSIBILITIES YOU DREAM OF.

The Intercity model combines flexibility
with the highest comfort.

The MAN TGE Intercity

All kinds of room for travelling in style: the MAN TGE Intercity is the perfect vehicle for making a grand entrance.

In its 16-seat model, entry via the side sliding door and a flexible seat mounting system offer full variability. The track system integrated into the floor with optional quick-release fasteners¹ allows for effortless installation or removal of seats for utmost flexibility. Plus, the electric sliding door¹ and electrically extendable step operated via the simple push of a button add even greater comfort.

As a 19-seat model it features low entry height and an electric outward gliding door, adding extra comfort as well as extra seats. The Intercity is perfect as a shuttle bus for schools or clubs and is always a practical companion for excursions in the hospitality sector. The series standard emergency braking system and crosswind assistant set an extraordinary standard in terms of safety and can be augmented with numerous additional assistants such as a rear view camera¹ or fatigue recognition system¹.

The MAN TGE Intercity comes with rearwheel drive and either a 6-gear manual transmission or an 8-gear automatic transmission, and it can be tailored to meet many other individual requirements.

¹ Special fitting for an additional price.

MAN TGE Intercity | Perfect for Shuttle Services.

Seating Configurations – Comfortable and Versatile

The MAN TGE Intercity is available in two seating configurations. Either with 19+1 seats or the variant with 16+1 seats and a luggage compartment behind the last row of seats. This allows for easy installation of either individual seats or a combination of single and double seats. Thanks to the practical optional quick-release mechanisms, passenger seats can be effortlessly installed and removed.

THE DIRECT ROUTE TO LUXURY AND PERFORMANCE.

The Coach models impress with
their extensive range of fittings.

The MAN TGE Coach

Power meets pleasure: the MAN TGE Coach is the perfect minibus for discerning groups on the move and individual transport.

With the MAN TGE Coach, up to 16 passengers can be afforded maximum travel comfort. High-quality adjustable leather seats and ample space ensure a pleasant journey even when the road is long. Every seat is equipped with its own ventilation regulator for the series-standard climate control system, individual lighting and storage compartments for handbags or backpacks. Additional luggage items can be easily stored in the capacious boot. USB ports at every seat and a shelf for phones make sure each passenger has access to individualised entertainment options. The wood-look flooring and imitation leather interior side panelling create an extraordinarily luxurious ride, and ambient lighting¹ puts the finishing touches on the elegant interior fittings.

The best safety possible is also ensured, as the MAN TGE Coach is not only powered by a 120-kW engine, but is also equipped with three-point seat belts, numerous assistance systems and a rear view camera¹. Passengers are thus sure to travel with first-class comfort and reach their destination safely.

¹Special fitting for an additional price.

Highlights of the TGE Coach

Privacy glass windows

No curious stares into the vehicles and private areas stay private.

Entry via the front passenger door

Entry via the electric gliding door on the passenger side.

MAN TGE Coach | Comfort for discerning passengers.

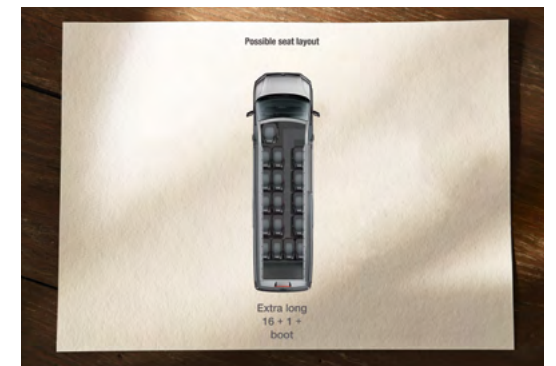

Seat configuration – comfortable and elegant

Its 16 passenger seats plus the driver's seat guarantee that all interior space is used optimally. Thanks to fixed installation of the seat posts unimpeded legroom. Perfect for smaller groups that wish to travel in style and comfort.

Rear flap access to large boot – sophisticated and capacious

More leg space and room to move for passengers: the low inset boot offers plenty of space for large luggage items. Despite its impressive capacity, however, travelling up or down more demanding inclines can be taken in its stride, without making contact with the road. Insulation and panelling round out the boot's high-quality workmanship.

Storage System.

The moment you step into the interior, you realize you're not in an ordinary minibus.

Thanks to the well-thought-out storage concept for the driver, everything has its place. In addition to the particularly spacious and deep storage compartments below the entire windshield, there are additional compartments and storage

areas in the overhead console, above the spacious glove compartment, and within the doors. The dashboard features 2 cup holders for both the driver and passenger, along with 2 (optional 3) 12V power outlets, a mini jack socket, and 2 USB ports. Upon request, you can have a fourth 12V outlet as well as a 230V outlet on the driver's seat console.

- 5 – Lockable Glove Compartment
- 6 – Well-Designed Storage System with Dividers

¹Special fitting for an additional price.

Connectivity - Infotainment.

With the new generation of online-capable infotainment systems¹, we are here to make your daily life easier in the future.

Working in conjunction with the standard telematics box², you gain access to various mobile online services. The new infotainment systems are intuitive and straightforward to use, available in four different functional ranges.

1 – MAN Media Van Business Navigation

– The All-Inclusive Package

- 8-inch TFT color display with touchscreen
- DAB+ capability³
- Hands-free system
- Wireless MAN SmartLink for connecting a smartphone via Bluetooth or WLAN
- Includes a two-year license for navigation with live traffic data and regular map updates (extension possible via MAN Now)
- Utilizes online services (weather updates, current news)
- Enables music streaming services through a smartphone (MirrorLink™, Apple CarPlay™, Android Auto™)
- Includes connectivity for MAN DigitalServices and MAN Connect services

2 – MAN Media Van Business – Elevated Comfort

- 8-inch TFT color display with touchscreen
- DAB+ capability³
- Wireless MAN SmartLink for connecting a smartphone via Bluetooth or WLAN
- Utilizes online services (weather updates, current news) without live traffic function
- Includes connectivity for MAN DigitalServices and MAN Connect services

Touchscreen operation

Touchscreen with proximity sensing (except in MAN Radio Van package)

3 – MAN Media Van – Classic with Touchscreen

- 6.5-inch TFT color display with touchscreen
- DAB+ capability⁴
- Hands-free system and MAN SmartLink for connecting a smartphone via cable
- Enables music streaming services through a smartphone (MirrorLink™, Apple CarPlay™, Android Auto™)
- Includes connectivity for MAN DigitalServices and MAN Connect services

¹ Special fitting for an additional price.

² Not available in MAN eTGE, vehicles without a radio or vehicles with no radio compartment.

³ Excluding Israel, Morocco, Mexico, Turkmenistan, Ukraine.

Driver's Seat.

Whether you're on your way to the next destination or enjoying a well-deserved break, you're in the company of a true professional in the MAN TGE. The driver's workspace and cockpit offer the utmost in ergonomics and comfort – even on rough roads. The cleverly designed and versatile storage areas and compartments ensure perfect order.

Seat Variants and Upholstery

The seats are available in 6 variants: from „Standard“ to „Comfort“¹ and „Comfort Plus“¹, optionally available as a swivel seat¹, all the way to the highly ergonomic „ergoComfort“¹ with AGR quality seal, which even features a massage function as „ergoActive“¹. MAN TGE also provides you with a wide range of seat cover options. Choose between extremely durable, proven in the commercial vehicle industry, long-lasting „Marathon“¹ robust fabric seat covers and the standard „Toronto Grid“ fabric seat cover. Additionally, a high-quality seat cover made from „Mesh“¹ synthetic leather is available.

1 – Driver's Seat „Comfort Plus“¹

The „Comfort Plus“ driver's seat is equipped with a 4-way electrically adjustable lumbar support and foldable armrests on both sides, allowing you to recline comfortably even during long journeys.

¹Special fitting for an additional price.

Air conditioning for driver's area.

In a MAN TGE, you can set your climate to be just right in no time. Optimal climate is key to ensuring the comfort of the driver and giving them a secure feeling every time they drive. The MAN TGE is equipped with intelligent systems that help to create an all-round optimal interior temperature.

Heating and ventilation

The MAN TGE comes with heating and ventilation as standard.

1 – Climatic¹ (manual)

Continuously variable climate controls ensure the interior temperature is exactly as desired.

2 – Climatronic¹ (automatic)

With this system, temperatures can be individually adjusted in two or three zones including those of the driver, front passenger and cargo/passenger areas. It takes into account the intensity of the sun and the exterior temperature and then adjusts the air conditioning to compensate. Automatic air recirculation, an air quality sensor, additional air vents in the roof panelling¹ and optional additional heating also ensure a pleasant interior climate.

¹ Special fitting for an additional price. Refrigerant R1234yf is used in vehicle classes N1, M1, N2 and M2. The GWP value of the refrigerant used is 4 (refrigerant R1234yf). The quantities vary between 540 – 570 grams with one air conditioning compressor and 785 – 815 grams with two air conditioning compressors. Refrigerant R134a is used in the eTGE. The GWP value of the refrigerant used is 1,430 (refrigerant R134a). The quantities depend on the air conditioning compressor and vary between 560 – 590 grams

Passenger Seats.

When it comes to seating, the MAN TGE offers quite a range of solutions.

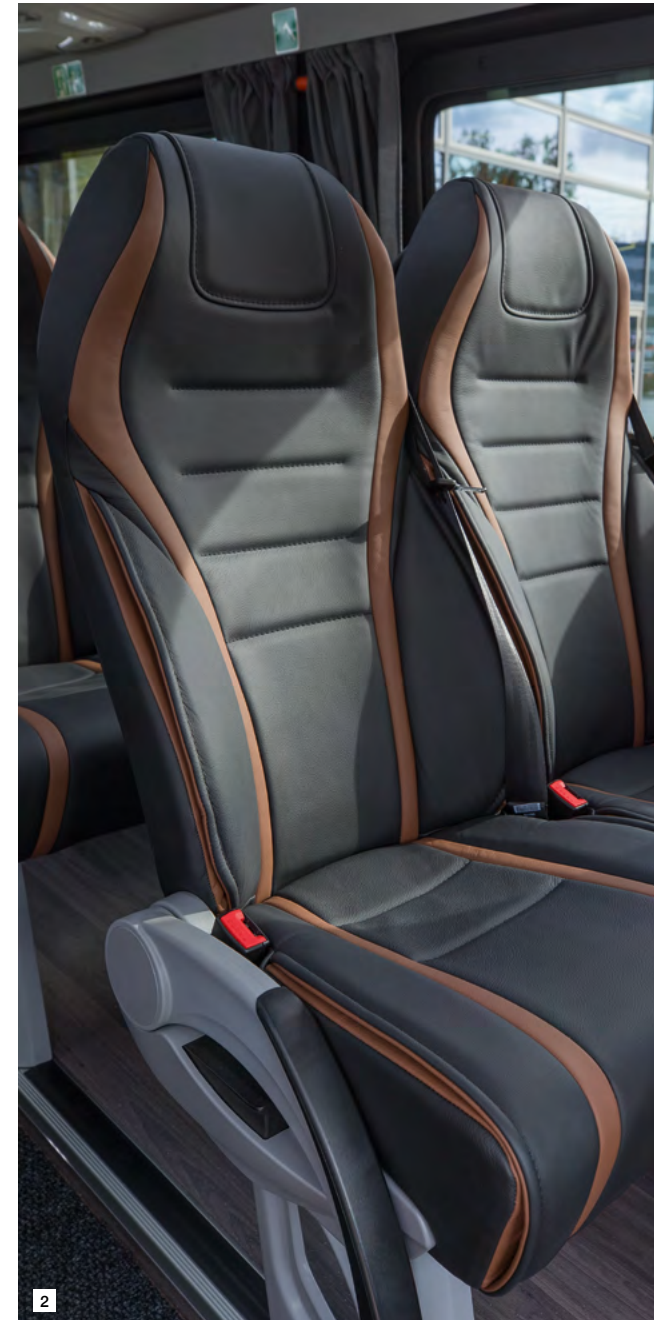

Even when it comes to seating, the MAN TGE doesn't settle for just one solution. The passenger seats impress with their flexible usage options, ergonomic design, and a variety of seat cover options¹. For technical convenience, USB ports² are provided, serving as practical charging stations for smartphones, for example. The MAN TGE Intercity, Combi Van, and Coach offer passenger-friendly legroom and storage space for light luggage beneath the individual or double seats. Spacious gaps between the seat rows provide additional comfort.

1 – MAN TGE Combi Van

For added comfort in the MAN TGE Kombi, seats can be individually enhanced with armrests². The seat cover fabric is tailored to the interior design, offering a choice between fabric and synthetic leather options.

2 – MAN TGE Intercity and Coach

The built-in seats with 3-point seat belts provide standard comfort for the MAN TGE Intercity and Coach. Tailored luxury is also ensured: You have the choice of seven interior equipment variants and optional USB charging ports² as well as hostess call² in the service sets.

¹ Color discrepancies in the representation are possible due to printing reasons.

² Special fitting for an additional price.

Passenger Compartment Air Conditioning.¹

Automated or completely individual: How the wind blows can also be determined by the passenger in the MAN TGE.

The MAN TGE offers a variety of options to ensure the perfect climate and a pleasant driving experience in the passenger compartment. Each model can be equipped with a separate air conditioning system¹ that ensures precise temperature regulation. In the MAN TGE Intercity and Coach models, the air conditioning system provides an especially high supply of fresh air to the passenger compartment. For the cold season, the parking heater¹ and dual convectors in all models offer a comfortable solution. Additionally, there are other specific variants, such as heat-insulated windows² or adjustable nozzles² on the seats.

1

- 1 – Control Unit of the MAN TGE Combi Van for Auxiliary Heater¹
- 2 – Comfort Headliner with Ventilation Channel¹ in the MAN TGE Combi Van
- 3 – Control Panel in the MAN TGE Intercity and Coach

¹ Optional equipment at an additional cost. In vehicle classes N1, M1, N2, and M2, the refrigerant R1234yf is used. The Global Warming Potential (GWP) value of the used refrigerant is 4 (refrigerant R1234yf). The refrigerant quantities vary between 540 – 570 grams with a single air conditioning compressor and 785 – 815 grams with two air conditioning compressors. The eTGE uses the refrigerant R134a. The GWP value of the used refrigerant is 1,430 (refrigerant R134a). The refrigerant quantities depend on the air conditioning compressor and vary between 560 – 590 grams.

² Optional equipment at an additional cost.

3

Lighting.

From entry to the ceiling, the MAN TGE sets the right mood with its lighting. The MAN TGE Intercity and Coach come standard with an elongated white light in the headliner, which is enhanced with blue ambient lighting in the MAN TGE Intercity and Coach. In the MAN TGE Coach, integrated lights for individual seat illumination are also present on the luggage compartments. The floor area is further enhanced by the ambient lighting, creating a particularly cozy atmosphere, and it's included in the standard equipment of this model.

- 1 – Lighting in the MAN TGE Coach and Intercity
- 2 – LED Lighting in the MAN TGE Combi Van

WE PREFER THE SAFE ROAD

Innovative and reliable assistants.

Assistance Systems.

You need a team you can rely on. That's why the MAN TGE doesn't come alone – it's equipped with a variety of innovative safety systems that assist you within the limits of each system, helping you focus even more on your work. At the same time, they help prevent vehicle damage and reduce costs for you.

1 – Standard Emergency Brake Assist (EBA)

When the MAN TGE approaches an obstacle and the driver doesn't react, the standard Emergency Brake Assist warns the driver and initiates automatic braking in case of emergency. When combined with the automatic transmission, it can even brake autonomously to bring the vehicle to a complete stop in case of an impending collision.

2 – Adaptive Cruise Control (ACC)¹

The adaptive cruise control with speed limiter ensures high comfort. In conjunction with an automatic transmission, it can brake to a complete stop.

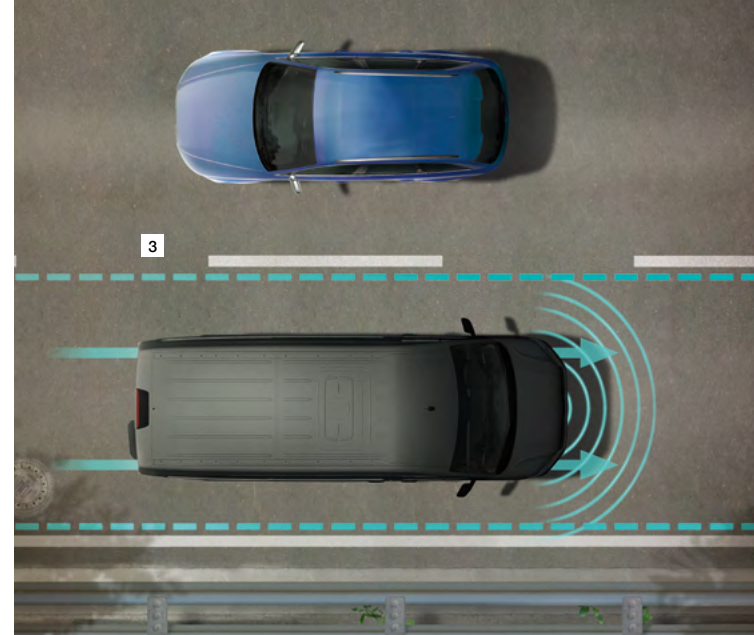

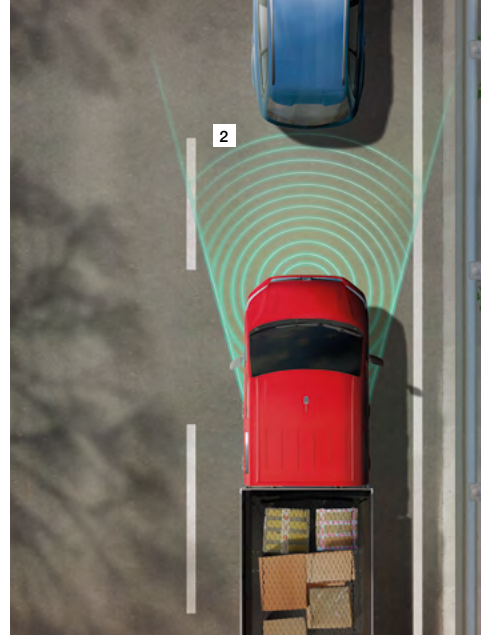

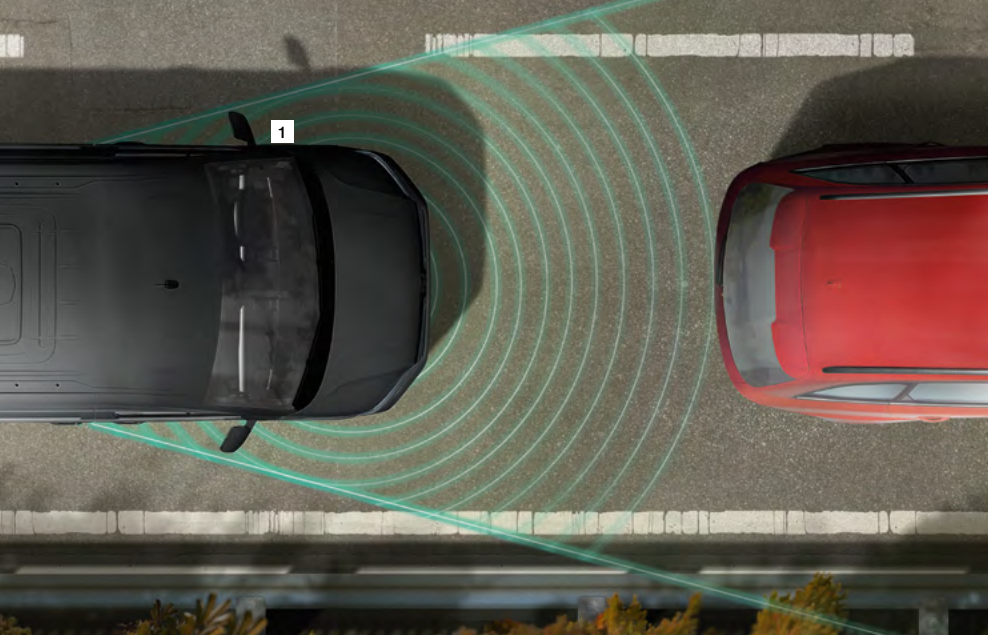

3 – Active Lane Keeping Assist¹

When the vehicle appears to unintentionally leave its lane, the active lane keeping assist intervenes by counter-steering to keep it in the lane. It activates automatically at speeds above 65 km/h and works even in adverse weather conditions and darkness.

Crosswind Assist

It helps the driver maintain the lane safely in case of crosswinds or on roads with uneven surfaces.

Additional assistance systems.

Lane change assist:¹ lane change assist warns the driver of oncoming traffic in the driver's blind spot when changing lanes at speeds over 10 km/h. The system prevents potential collisions during lane changes – in city traffic and on the motorway.

Fatigue detection:¹ this system detects deviations from normal driving behaviour that indicate fatigue and then advises the driver with an acoustic and visual signal to take a break.

Multicollision Brake System: It initiates an automatic full braking of the vehicle after detecting a collision, helping the driver prevent secondary accidents.

High Beam Assist:¹ It detects preceding and oncoming vehicles and automatically switches to low beam to prevent dazzling them.

Light/Rain Sensor:¹ It automatically reacts to darkness and rainy weather by regulating the headlights and windshield wipers.

Hill Start Assist: It provides automated support for starting on inclines, preventing rollback.

Parking Assist:¹ It aids the driver in parking and maneuvering by providing acoustic and visual signals indicating the remaining distance in the front and rear areas.

Rear View Camera:¹ It displays images on the cockpit monitor and assists in parking, maneuvering, and reversing.

ABS & ESP: The Electronic Stability Program (ESP) is an extension of the Anti-Lock Braking System (ABS). This electronically controlled driver assistance system can counteract vehicle skidding by selectively braking individual wheels.

¹ Special fitting for an additional price.

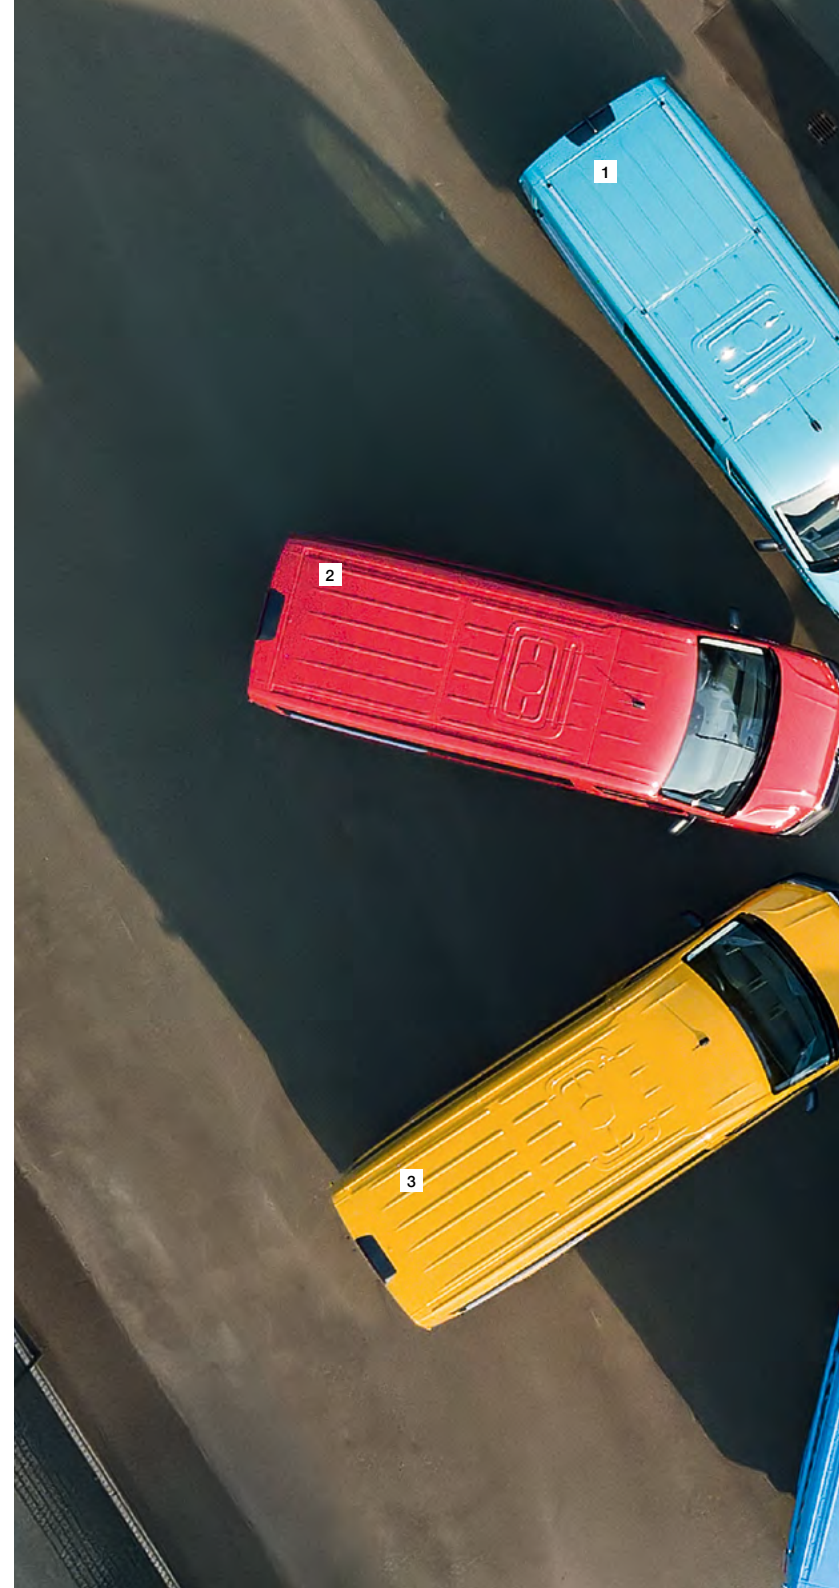

Wheels.

The MAN TGE's wheels keep you rolling in style.

It's your choice: light-alloy wheels, or steel wheels with full hubcaps or with centre caps.

- 1 – Steel Wheel with Full hubcap¹
- 2 – Steel Wheel with centre cap in chrome¹
- 3 – Light-alloy wheel¹
- 4 – Twin tyres from 5 tons vehicles: steel wheel in black or silver

¹Special fitting for an additional price, only available for Combi Van

Paint finishes.²

Your MAN TGE is like a business card on wheels:

whether solid-coloured, metallic, Deep Black Pearlescent or a special paint finish – now you can show your true colours and make a great impression.

- 1 – Danish Blue¹
- 2 – Cherry Red
- 3 – Colza Yellow¹
- 4 – Sky Blue¹
- 5 – Indium Grey Metallic¹
- 6 – Candy White
- 7 – Deep Black Pearlescent¹
- 8 – Reflex Silver Metallic¹

And if Candy White isn't candy enough or Deep Black isn't deep enough for you, there are over 90 other finishes for you to choose from.

¹ Special fitting for an additional price.

² The illustrated colours may vary due to technical aspects of the printing process.

Drive and Powertrain.

What's the most important thing on the job? Having the right drive. That's why the MAN TGE impresses equally in terms of performance and efficiency – with cutting-edge diesel and electric engines.

These engines have been developed especially to meet the needs of the utility vehicle segment and combine long service life with high power and low consumption. So no matter what transmission or drive type you choose, these engines deliver outstanding performance, high efficiency and superb reliability even under extreme driving conditions.

MAN Combi Van

For the TGE Combi Van, both front-wheel drive and all-wheel drive options are available for vehicles up to 4 tons.

MAN TGE City, Coach, and Intercity

These models are standard 5-tonners and come equipped with a 120 kW engine, rear-wheel drive, and an 8-speed automatic transmission. The TGE Intercity is also optionally available with a manual transmission.
