

# MAN LION'S INTERCITY LE.

Low entry. High flexibility.

# TAKES ME TO THE COUNTRY.

Are you looking for a bus that offers you full configuration flexibility and guarantees maximum operation economy? The MAN Lion's Intercity LE, available in three lengths, offers you all that and much more. By combining the advantages of a city bus and an intercity coach, this low-entry bus provides you with the best solution from two worlds.

14,46 m  
Lion's Intercity LE 14

13,14 m  
Lion's Intercity LE 13

12,44 m  
Lion's Intercity LE 12

**Two tyre sizes**  
Intercity-oriented tyres,  
size 295/80 R22.5  
City-oriented tyres,  
size 275/70 R22.5

**Door configuration as required**  
with different door systems from the  
MAN modular technology system

# TAKES ME TO THE CITY.

Add to that our individually tailored financing solutions, flexible service contracts and digital fleet services as well as professional driver trainings and you benefit from a sustainable transport solution with real added value in terms of flexibility, economy and driving comfort.

**Two selectable driver workplaces**  
Comfortable and intuitive for use in demanding  
urban traffic as well as on longer routes.

# CONFIGURE AS YOU WISH.

Thanks to its intelligent modular design, you can easily tailor the MAN Lion's Intercity LE to your requirements. Door configuration, tyre size, seating arrangement and seat types can be freely selected. In addition, you have full flexibility when it comes to the design of handrails and luggage racks. For the driver's workplace, you can choose from two equipment variants with excellent driving comfort.

No matter which option you finally decide upon, with the MAN Lion's Intercity LE you always benefit from the highest quality standards, maximum economy and the best feel-good comfort.

# LOW WEIGHT, HUGE ADVANTAGE.

The multiple award-winning MAN Lion's Intercity LE is a real lightweight. This not only ensures low fuel consumption, but also guarantees increased passenger capacity and the greatest possible dynamics. MAN EfficientHybrid technology is also available for all ver-

sions, allowing you to increase the efficiency of your vehicle while reducing its noise and pollutant emissions. At stops and traffic lights, the MAN Lion's Intercity LE is even completely emission-free thanks to the start-stop system.

# YOUR ADVANTAGES AT A GLANCE.

- **Flexible and need-oriented configuration** thanks to modular design
- **Maximum economy** thanks to low fuel consumption, MAN EfficientHybrid and high passenger capacity
- **Exemplary ease of maintenance** thanks to segmented side walls
- **Optimum driving comfort** thanks to ergonomic driver's workplace and modern passenger area

# A REAL FEEL-GOOD RIDE.

You don't only make a point of having a cost-efficient business, but also of ensuring your driver and passengers a comfortable experience? In that case, our MAN Lion's Intercity LE is your best choice. The spacious passenger compartment, which can accommodate up to 121 passengers, features comfortable seats, large luggage racks and several USB ports,

among other things. The high glass surfaces and the window in the roof area make the interior appear bright and flooded with light during the day. In the morning and evening hours, the modern lighting concept with direct, warm LED lighting creates a pleasant ambience that invites you to switch off from hectic everyday life.

# THE VIP SEAT.

The driver's workplace is given special attention at MAN, because only if the driver can operate the vehicle easily and intuitively is his driving comfort and the safety of his passengers guaranteed. Depending on the operation area of your vehicle, you can choose between two ergonomic and user-friendly driver's workplace versions that meet the requirements of both demanding urban traffic and long-distance intercity operations.

Both driver's workplaces impress with excellent all-round visibility as well as comfortable and accurate control of the instruments and switches.

The new cockpit has a large digital display and can be easily adapted to a wide range of requirements. In addition, all controls are arranged in such a way that they do not distract the driver's attention from the traffic. The display and operating levels are arranged separately, while the controls can be reached from a comfortable seating position.

# A SAFETY POINT OF VIEW.

In dense urban traffic, it can happen that – despite good mirror technology – the driver overlooks other road users in the blind spot. The digital mirror replacement system MAN OptiView considerably reduces the risk of such accidents by making the blind spot visible to the bus driver. When turning, but also when changing lanes and manoeuvring, MAN OptiView ensures greater safety in road traffic.

How does this work? The digital system uses two cameras on each side of the vehicle to project the side and rear areas of the bus in high resolution and in real time onto two monitors inside the vehicle. In this way, the driver can see the blind spot.

# TURN RIGHT!

In addition, the radar-based MAN Turn Assist alleviates critical situations at intersections. The active warning of dangerous situations and impending collisions is provided visually by two displays installed in the driver's field of vision and acoustically by a warning signal if other road users are in the area of the vehicle sides or directly in front of the vehicle.

Moreover, a whole series of other advanced assistance systems ensure that the MAN Lion's Intercity LE is ideally equipped for critical driving situations.

[www.man.eu/bus/assistance-systems](http://www.man.eu/bus/assistance-systems).

# DIGITAL SOLUTIONS FOR MORE EFFICIENCY.

You want to make your MAN Lion's Intercity LE more efficient without too much effort? With MAN DigitalServices you can reduce consumption as well as wear and tear and encourage your drivers to drive more economically. With our proactive maintenance MAN ServiceCare you can also

increase the availability of your vehicle by avoiding unplanned breakdowns and always having an eye on the maintenance status. Furthermore, with the help of our digital compass you can locate your bus in real time and intervene in route planning in the event of a traffic jam.

## MAN DigitalServices\* offer you numerous advantages:

- Predictive control of driving and rest times (Compliant, Timed).
- Reliable, efficient route planning (Geo)
- Economical driving (Perform\*\*)
- Individual maintenance and repair management (MAN ServiceCare)
- Smart driver support (MAN Driver App)

\* Try MAN DigitalServices for your entire fleet for three months free of charge if you have not yet booked any of our chargeable services. The trial period ends automatically.

\*\* Fully available only for MAN Lion's Coach and NEOPLAN

Find out more at [www.man.eu/marketplace](http://www.man.eu/marketplace).

# OUR SERVICE FOR YOUR NEEDS.

Just like the MAN Lion's Intercity LE, our services can also be flexibly adapted to your needs. Individually tailored financing solutions, flexible mobility services, professional driver trainings and a Europe-wide breakdown service ensure that your business success does not fall by the wayside.

## MAN | Financial Services

MAN Financial Services\* help you stay financially mobile.

Lion's Intercity LE

URBAN VARIANT

From six different basic vehicles, you can flexibly configure your bus according to your needs. Thanks to state-of-the-art technology and versatile equipment, it is perfectly suited for both urban and intercity use. The driveline with D15 engine can be configured in three power levels from 280 to 360 hp with two selectable automatic transmissions.

The versatile MAN Lion's Intercity LE offers you real added value: more economy, more flexibility and more comfort.
