

**ADVENTURES HAVE NEVER BEEN  
SO RELAXING: THE MAN TGE.**

# ADVENTURE AWAITS.

Traveling in a motor home means freedom, flexibility, and simply feeling at home wherever you happen to be – whether on the campsite or in the wild.

As a manufacturer of vehicles for many different bodies, MAN has enjoyed an excellent reputation in caravanning for years – supplying everything from the luxury liner to the expedition truck. For all motor home fans, there is now the MAN TGE, a completely new basic vehicle in the 3.5-ton segment. Besides its outstanding handling, high level of safety, and wide-ranging basic versions, the MAN TGE is notable above all for its impressive comfort and absolute reliability. Discover a modern way of traveling and get to know the MAN TGE as a basic vehicle for motor homes.

# THE BEST, FROM THE GROUND UP.

The MAN TGE is one of the most modern basic vehicles in its class for a good reason. As a chassis with innovative technology and intelligent assistance systems, the MAN TGE provides a completely new driving experience, characterized by excellent handling, maximum safety, and an unparalleled level of comfort. There are also a number of optional extras, such as the smart all-wheel drive, which not only provides additional safety, but also makes it easy for you to make progress on difficult terrain and in all weather conditions.

The MAN TGE panel van will also get you safely to your destination in comfort. With up to 18.4 cubic meters, it provides an incredible amount of space for individual motor home bodies.

# RELAX AND HEAD FOR THE SUN – SAFELY.

Wherever the road takes you, the MAN TGE offers a perfect combination of maximum safety and superior comfort. A range of optional driver assist and safety systems such as Adaptive Cruise Control, Emergency Brake Assist and Lane Keeping Assist offer you automatic assistance and ensure your drive is as relaxed and safe as possible.

## MAN all-wheel drive<sup>1</sup>

The road to the most spectacular corners of the earth isn't always paved. Fortunately, this is not a problem, thanks to the smart all-wheel drive, because the all-wheel coupling system smoothly transfers the drive torque to the axle where it is needed within fractions of a second. As a result, whether you are on- or off-road, you will always feel safe and confident behind the wheel, whatever the weather.

## MAN automatic transmission<sup>1</sup>

You can enjoy a level of driving comfort usually reserved for a passenger vehicle with the automatic transmission from MAN. The eight-speed automatic gearbox not only provides more gears to choose from, but also cuts fuel consumption.

<sup>1</sup> Optional equipment at an extra cost.

## Adaptive Cruise Control (ACC)<sup>1</sup>

The Adaptive Cruise Control function with speed limiter provides extraordinary comfort. In conjunction with an automatic gearbox, it can bring the vehicle to a complete stop if necessary.

## Emergency Brake Assist (EBA) as standard

If the MAN TGE approaches an obstacle and the driver doesn't react, the EBA (fitted as standard) gives the driver an acoustic warning and activates the brake in an emergency. In combination with the automatic transmission, the system can even bring the vehicle to a complete stop.

## Active Lane Assist<sup>1</sup>

If there are signs that the vehicle is unintentionally straying from its lane, Active Lane Assist automatically intervenes and steers the vehicle back into the lane. The system is automatically activated at speeds over 65 km/h. Active Lane Assist functions reliably even in poor weather conditions and in the dark.

## Park Steering Assist<sup>1</sup>

If required, Park Steering Assist can take over the steering of your vehicle while parking, guiding your MAN TGE into even the tightest of spots. You still accelerate and brake manually, so you remain in full control of the vehicle at all times. It makes parking easier than ever and prevents damage caused by potential parking errors.

<sup>1</sup> Optional equipment at an extra cost.

# AS INDIVIDUAL AS YOUR TRAVEL DESTINATIONS.

Possible uses: the MAN TGE as a partially integrated or fully converted motor home.

## **WESTFALIA Sven Hedin**

Which motorhome enthusiast isn't familiar with the Sven Hedin series by Westfalia? The MAN TGE, when converted into a motorhome, offers ample space for living, dining, bathing, and sleeping despite its compact dimensions. Space-saving solutions in the elegant interior, such as the flexible rear storage area and the kitchen block with pull-out refrigerator, provide a total of four seats and two comfortable sleeping spots, including a generous transverse bed. The comfort of the WESTFALIA Sven Hedin is only surpassed by the functionality of the MAN TGE base vehicle.

### **PARTIALLY-INTEGRATED CAMPER CONVERSIONS**

The innovative MAN TGE chassis offers the perfect foundation for partially-integrated camper conversions. With a wide range of engines, the MAN TGE brings an outstanding amount of responsiveness and excellent handling to the motor home category. The outstanding comfort of the MAN cockpit and driver assistance systems will keep you safe and leave you feeling relaxed, even on long journeys.

# ABSOLUTELY FIRST CLASS: MAN SERVICE.

The outstanding local MAN Service is a key advantage when you drive a MAN TGE.

Wherever your adventures take you, you can rely on the unique MAN Service anytime and anywhere. Thanks to our long-standing experience in the commercial vehicle segment, you can take advantage of our outstanding MAN Service and our dense service network throughout Europe from the first moment. Whether you happen to be Italy, Spain or France, we are always there when you need us. In combination with the flexible opening times of the MAN service centres and our 24-hour breakdown service, nothing can keep you from your vacation adventures.
