

MAN TRANSPORT SOLUTIONS 360° RANGE.

We provide our customers with comprehensive support on the path to a fleet with alternative drives.

- Determination of range based on local conditions
- Analysis and simulation of suitable routes
- Design of the optimum charging and infrastructure concept
- Consultation regarding energy supply and management
- Verification of the service life of the vehicle battery
- Concepts for depot and workshop design

... all in terms of a stable system to ensure the highest reliability with maximum cost efficiency.

MAN Truck & Bus – A member of TRATON Group

MAN TRANSPORT SOLUTIONS.

Fleet consultancy for alternative drives.

COMPREHENSIVE CONSULTANCY FOR ALTERNATIVE TRANSPORT SOLUTIONS.

Global climate protection targets, local emission regulations, cleaner cities or company environmental targets based on fleet emissions – our customers' reasons for switching to alternative drive systems are multifaceted. The fact is that switching to new drive and fleet solutions raises lots of new issues that go far beyond the vehicle itself. The solution must therefore match the intended purpose, depending on the focus, range or payload. Particularly in the case of electromobility, charging solutions, energy supply and storage must be preemptively examined and ensured.

MAN Transport Solutions focuses precisely on this area, and creates customised transport solutions with the maximum cost efficiency for its customers. The consultancy services cover all aspects of the electromobility ecosystem – from fleet design, charging infrastructure, energy management, right up to a comprehensive system solution.
