

# MAN DRIVER APP.

Makes driving easier.

## By us. For drivers.

As the name suggests: the MAN Driver App is the app for drivers – support for all those who do this challenging job and are on the road in a truck, bus or van. The scope of services varies between versions, but one thing is always the same: the MAN Driver App makes everyday work much easier because it is simply app-solutely practical.

A breakdown? It can happen. The MAN Driver App ensures that help gets where you need it quickly. Or in the event of a damage report, the MAN Driver App connects the driver, fleet manager and workshop with each other as an effective team and shows the way to the nearest MAN service outlet. In addition, the MAN Driver App not only provides support in an emergency, but also offers many other smart functions to suit the vehicle.

## Why use the MAN Driver App?

- Because digital is simply better.
- Because it speaks 26 languages.
- Because it connects drivers, fleet managers and workshops.
- Because damage can be easily logged and communicated.
- Because it is also a digital vehicle manual.
- Because its data helps you improve.
- Because it guides you to the MAN service outlet.
- Because the multimedia functions are great.
- Because the MAN Mobile24 breakdown service works at the tap of a button.

## On your smartphone. Simple as that.

The MAN Driver App goes where it belongs: on your smartphone. The current version of the MAN Driver App is available for all drivers to download free of charge from the Google Play Store or the Apple App Store. Truck and bus drivers can log straight in to the MAN Driver App in just a few steps with their VIN, driver ID card, email address or telephone number. Drivers of MAN vans are registered via the Fleet Manager under the 'Driver Management' section on the RIO platform.

And by the way: the MAN Driver App improves over time, because we are constantly working on it and providing updates. Being good is not good enough for us. Getting ever better is simply the better option.

In any case, you should get started right away, because one thing is clear: life without the MAN Driver App is possible, but just far more stressful.

Search for 'MAN Driver' and get started now.
