

# MAN LION'S COACH.

Simply embrace the road ahead.

# A QUITE **EXPERIENCED** COACH.

Are you looking for an experienced coach and at the same time for a business partner as strong as a lion? Here it is! The MAN Lion's Coach has your company's profitability in mind and ensures a highly comfortable and safe travel experience. In addition, in combination with our individually tailored financing solutions, flexible mobility and digital services as well as professional driver trainings, the MAN Lion's Coach offers you numerous advantages that simplify your business and make it more successful.

## THE EFFICIENCY COACH.

On the road, the MAN Lion's Coach impresses with higher performance and lower consumption. With a choice of 440, 480 or 520 hp, the revised MAN D26 engine offers full power while its lightweight design ensures reduced fuel consumption.

In addition, the highly efficient driveline in combination with the updated MAN EfficientCruise® supports economical driving. The GPS-supported cruise control not only detects the route course with uphill and downhill gradients up to three kilometres in advance, but also recognises roundabouts and towns. It automatically adjusts the driving gear and speed in line with a fuel-optimised driving style. Furthermore, the system activates the MAN EfficientRoll® function as soon as it detects that more fuel can be saved.

The intelligent combination of MAN EfficientCruise® and MAN EfficientRoll® is easy on your wallet and allows the driver to better concentrate on driving.

## DIGITAL SOLUTIONS FOR ENHANCED EFFICIENCY.

You want to make your MAN Lion's Coach more efficient without too much effort? With MAN DigitalServices you can reduce consumption as well as wear and tear and empower your drivers to drive more economically. With MAN ServiceCare you can also increase the availability of your vehicle by avoiding

unplanned breakdowns and always having an eye on the maintenance status. Furthermore, with the help of our digital compass you can locate your bus in real time and intervene in route planning in the event of a traffic jam.

MAN DigitalServices\* offer you numerous advantages:

- Predictive control of driving and rest times (Compliant, Timed).
- Reliable, efficient route planning (Geo)
- Economical driving (Perform)
- Proactive maintenance and repair management (MAN ServiceCare)
- Smart driver support (MAN Driver App)

Find out more at [www.man.eu/marketplace](http://www.man.eu/marketplace).

\*Try MAN DigitalServices for your entire fleet for three months free of charge if you have not yet booked any of our chargeable services. The trial period ends automatically.

## WHERE **COMFORT** MEETS CONTROL.

You don't only focus on efficiency, but also make a point of ensuring that drivers and passengers feel comfortable at all times? So do we.

That's why we have redesigned the cockpit to take as much of the strain off the drivers as possible and allow them to control the innovative assistance and comfort functions intuitively, comfortably and safely.

The new cockpit has a 12-inch digital display and can be conveniently adapted to a wide range of requirements. The multifunction steering wheel, for example, is adjustable in height and tilt and ensures a perfectly ergonomic workplace.

The **numerous assistance and comfort functions** can be controlled easily and without distraction using the innovative **MAN SmartSelect** control element via the 7-inch media display. With its turn-and-push function, MAN SmartSelect reduces the need to take your eyes off the road while operating the infotainment and navigation menus to a minimum.

In addition, all controls are arranged in such a way that they do not distract the driver's attention from the traffic. The display and operating levels are arranged separately from each other and can be reached comfortably from a seated position. At the wheel of the MAN Lion's Coach, drivers experience pure driving pleasure.

# THE SAFETY COACH.

Numerous innovative assistance systems in the MAN Lion's Coach ensure that drivers and passengers arrive safely at their destination.

## ■ Electric parking brake

To the left of the driver's seat is the switch for the electric parking brake. This can be operated at any time, but also comes into play automatically when the vehicle is parked and releases itself when the vehicle is started.

## ■ Emergency Brake Assist (EBA)

The advanced Emergency Brake Assist\* detects emergency braking situations and warns the driver in good time. If the drivers do not react, emergency braking is initiated and the emergency stopping signal (ESS) is activated in addition to the brake lights. Cyclists and pedestrians are also reliably detected. The hazard warning lights signal the emergency situation to other road users and thus reduce the risk of a rear-end collision.

## ■ MAN AttentionGuard

The MAN AttentionGuard\* helps minimise the risk of accidents by detecting the first signs of lack of concentration and overtiredness at an early stage and warning the driver by means of a visual and acoustic signal.

## ■ MAN OptiView

The MAN OptiView\* digital mirror replacement system makes the blind spot visible when turning, changing lanes and when manoeuvring by means of two cameras on each side of the vehicle.

## ■ Lane Change Assist

This system\* warns drivers of impending collisions with other vehicles when changing lanes. The acoustic and visual warning is given as soon as the system detects a parallel moving object or one approaching at high speed from behind.

## ■ MAN Turn Assist

If your MAN Lion's Coach is driving through towns, the radar-based, active warning system Turn Assist\* defuses critical situations at intersections. This system actively warns the driver of dangerous situations and impending collisions visually as well as acoustically using a warning signal if other road users are in the vicinity of the vehicle sides or directly in front of the vehicle.

## ■ Lane Return Assist

If the vehicle threatens to leave the specified lane, Lane Return Assist\* warns the driver by means of visual and haptic or acoustic signals. In addition, the system automatically and carefully steers the vehicle back into the lane.

## ■ Traffic Jam Assist

In traffic jam situations, Traffic Jam Assist\*\* steers behind a stopped vehicle, brakes to a standstill and starts up again by itself. This avoids a close approach and reduces the risk of collision.

## ■ MAN High Beam Assist

MAN High Beam Assist\* adjusts the vehicle's low beam and high beam to the brightness of day and night and ensures that other road users are not inadvertently dazzled. At the same time, it increases the visibility of one's own vehicle and reduces strain on the drivers, who can concentrate better on the traffic as a result.

Find out more on our website

[www.man.eu/bus/assistance-systems](http://www.man.eu/bus/assistance-systems).

\* Within the limits of the system.

\*\* As the Traffic Jam Assist is an assisting system, the driver must always be ready to steer and keep his hands on the steering wheel.

# STEP INSIDE THE COMFORT ZONE!

Anyone who enters the spacious and modern interior of the MAN Lion's Coach knows immediately that in this case you'd better not leave your comfort zone. The light-flooded interior, the indirect lighting and the sophisticated interior make you feel as if you're on holiday as soon as you get in.

The extremely comfortable seats with adjustable headrests invite your passengers to relax and enjoy the journey.

Those who crave a little entertainment can personalise their travel experience with the innovative MAN Multimedia Coach infotainment system along with the convenient tablet holder and USB port on every seat.

# YOUR COACH IN BEST HANDS.

From time to time, it is inevitable that your MAN Lion's Coach will no longer be roadworthy. In such cases, you will be in best hands at one of our MAN service centres: From the diagnosis, maintenance and repair of your vehicle to the clarification of warranty and goodwill issues, we are the strong partner at your side.

In addition, we ensure the unrestricted mobility of your coach with individually tailored financing solutions, flexible mobility services, professional driver trainings and a Europe-wide breakdown service.

Highest quality over the maximum vehicle service life and excellent uptime – that's our promise to you. Our comprehensive range of services is tailored to your needs and helps you to increase the efficiency and profitability of your business.

You can rest assured at all times: your MAN Lion's Coach is in the best hands with us.
